RESEARCH PROVEN FEED SUPPLEMENTS

FORAGE PLUS (CATTLE BOOSTER)

Balances deficiencies in forage and stimulates intake and digestion allowing all cattle to achieve optimum performance
Available in 40kg and 22.5kg tubs.

KEY BENEFITS

- Optimises performance by stimulating forage intakes and digestibility while providing all essential mineral, trace elements and vitamins
- Improves animal health and fertility, increasing pregnancy rates in heifers
- Increases DLWG by up to 36% allowing heifers to reach bulling weight earlier
- Reduce the risk of acidosis by stimulating saliva production to help maintain a stable rumen pH
- Helps buffer wet acidic silages and stimulate silage intakes
- Reduces loss of body condition in early lactation to optimise performance and fertility

FEEDING GUIDELINES

Rates:
2x 40kg tubs/40 cattle.
2x 22.5kg tubs/20 cattle.
Typical intakes:
Growing cattle: 100-200g/day.
Lactating cows: 100-200g/day.

WHEN TO FEED

- All youngstock dairy and beef all year round
- Breeding bulls for optimum fertility and performance all year round
- Lactating dairy cows or beef cows at pasture

DRY COW (PRE-CALVER)

Prepares cows (dairy and beef) for calving, providing for healthy thriving calves
Available in 40kg and 22.5kg tubs

KEY BENEFITS

- Optimises performance by stimulating forage intakes and digestibility while providing all essential mineral, trace elements and vitamins
- Maintains optimum blood magnesium levels to reduce the risk of milk fever and 'slow calvings'
- Supports and maintains a strong, healthy immune system
- Optimises calf health and vigour (more 'get up and go')
- Reduces the risk of difficult calvings and retained placenta
- Conditions cows during the pre-calving period to maintain optimum health so they transition more easily into lactation

FEEDING GUIDELINES

Rates:
2x 40kg tubs/40 cattle.
2x 22.5kg tubs/20 cattle.
Typical intakes:
200g/cow/day.

WHEN TO FEED

- Two months prior to calving for both dairy and beef cows

BEET BALANCER

Specially formulated to balance the diets of cattle fed on fodder beet
Available in 40kg tubs

KEY BENEFITS

- Balances the key nutritional deficiencies typically seen in fodder beet diets
- Contains good levels of calcium and phosphorus
- Includes 5% magnesium - particularly important for pregnant cows
- Contains high levels of all essential trace elements and vitamins
- Palatable, even alongside fodder beet so intakes are regular and steady

FEEDING GUIDELINES

Rates:
2x 40kg tubs/40 cattle.
Typical intakes:
100-150g/cow/day.

WHEN TO FEED

- Feed to youngstock and dry cows over the winter period when grazing on fodder beet

ORGANYX EXTRA

Fully approved 100% organic feed for cattle and goats
Available in 22.5kg tubs

KEY BENEFITS

- Optimises performance by stimulating forage intakes and digestibility
- Fully approved 100% organic feed
- Improves animal health and performance
- Does not break up in cold wet conditions

FEEDING GUIDELINES

Rates:
2x 22.5kg tubs/20 cattle/40 goat.
Typical intakes:
100-200g/cow/day.
40-60g/goat/day.

WHEN TO FEED

- Suitable for year round feeding to all cattle and goats

EXTRA HIGH ENERGY

Ideal for ewes, lambs and rams for optimum performance all year round
Available in 22.5kg tubs

KEY BENEFITS

- Optimises performance by stimulating forage intakes and digestibility while providing essential minerals, proteins, trace elements and vitamins
- Increases ovulation rates and lamb numbers at scanning
- Maintains ewe body condition during pregnancy to maximise lamb vitality and health
- Reduces the risk of twin lamb disease (sleepy sickness)
- Optimises lamb birth weight to produce healthy vigorous lambs
- Enhances ewe milk production for improved lamb daily weight gain
- Suitable for sheep, cattle, deer, goats and horses
- Improves health and performance

FEEDING GUIDELINES

Rates:
2x 22.5kg tubs/40 sheep.
Typical intakes:
20-30g/ewe/day.
10-20g/lamb/day.

WHEN TO FEED

- All year round
- Flushing and tupping to ensure ewes and rams are in the ideal body condition score for breeding
- Mid pregnancy feeding ensures ewe body condition remains strong
- Weaning and finishing lambs, provides all the supplementary nutrients necessary to balance grass and make up for the loss of the ewes milk

EASY BREATHER

Reduces the risk of respiratory upset in calves and sheep
Available in 22.5kg and 5kg tubs.

KEY BENEFITS

- Helps keep airways clear and reduces stress
- A natural aid to help reduce coughing and respiratory irritation
- Helps calves and sheep regain their appetite after a stress or challenge
- A powerful natural aid to help calves and sheep resist respiratory challenges
- Reduces the risk of growth checks

FEEDING GUIDELINES

Rates:
1x 5kg tub/8-10 calves (under 3 mths).
2x 22.5kg tubs/20 older cattle/Sheep.
Typical intakes:
5g-10g/lamb/day.
20g-30g/calf/day.
20g-30g/sheep/day.
40g-60g/older calves/day.

WHEN TO FEED

- Calves up to weaning.
- Whenever sheep are suffering respiratory challenge
